

ARCW Medical Home Delivers Results

Average Cost Per Patient

Average Number of Days in Hospital

- Patients receiving care at ARCW had a **52%** lower hospitalization rate than HIV patients receiving care elsewhere.
- Patients receiving care at ARCW had a **48%** lower rate of emergency room visits than HIV patients receiving care elsewhere.

Researchers from the University of Wisconsin Center for Health Systems Research and Analysis have evaluated the outcomes of the ARCW HIV Medical Home, concluding:

.....
"It is an important study revelation that an ongoing primary care relationship with ARCW is the most influential factor in reducing costs, hospital stays/admits and the diagnostic incidence of chronic disease."
.....

The report concluded that the Wisconsin Medicaid program can be confident it made a wise policy decision to name ARCW the state's HIV Medical Home.
